

# Pinup Server Installing Guild

1. make pinup\_opt\_install.sh following step

# cd pinup\_opt\_install.sh

Following this bash script code...

```
!/bin/bash
#install Tomcat for project Pinup by NKZ@KMITL for Project Pinup Application
yum install java
cd /tmp
wget http://www.eu.apache.org/dist/tomcat/tomcat-7/v7.0.65/bin/apache-tomcat-7.0.65.tar.gz
tar xzf apache-tomcat-7.0.65.tar.gz
mv apache-tomcat-7.0.65 /usr/local/tomcat7
cd /usr/local/tomcat7
firewall-cmd --zone=public --add-port=8080/tcp
echo "Install Finished"
```

2. make pinup\_opt\_start.sh following step

# cd pinup\_opt\_start.sh

Following this bash script code...

```
!/bin/bash
#Start Tomcat Server Script by NutkungZ@KMITL for Project Pinup Application
cd /usr/local/tomcat7
./bin/startup.sh
```

3. make pinup\_opt\_stop.sh following step

# cd pinup\_opt\_stopt.sh

Following this bash script code...

```
!/bin/bash
#Start Tomcat Server Script by NutkungZ@KMITL for Project Pinup Application
cd /usr/local/tomcat7
./bin/shutdown.sh
```

4. Run pinup\_opt\_install.sh to install server first time.

# bash pinup\_opt\_install.sh

5. Run pinup\_opt\_start.sh to startserver

# bash pinup\_opt\_start.sh

6. Run pinup\_opt\_stop.sh to stop tomcat server

# bash pinup\_opt\_stop.sh
